## Vancouver Island's one-stop, sustainable alternative to landfilling & quarrying.

Water Neutral

Lower CO<sub>2</sub>

Small Land Footprint

No Mining

Waste-to-Resource

GRT's Resource Regeneration Facility uses a unique tech stack to wash and sort excess soils, producing 100% recycled aggregate for your construction, landscaping, and reclamation needs. No virgin material used. Ever.

GRT accepts upland soils, hydrovac and dredge material up to IL+ levels. We do not accept hazardous waste.
